EDUCATION

Mar. 2019~ Feb. 2021 — **DONGGUK UNIVERSITY** — **Seoul, Korea**
Department of Electrical & Electronic Engineering
- Master of Science in Image Processing and Computer Vision (Advisor: CS Won)
- Thesis: Volume Dropout on 3D convolutional neural network for video action recognition
- Related Course: Machine Learning, Digital Video Processing, Neural Network Theory (GPA: 4.36/4.5)

Mar. 2013~ Feb. 2019 — **DONGGUK UNIVERSITY** — **Seoul, Korea**
Department of Electrical & Electronic Engineering
- Bachelor of Science in Electrical & Electronic Engineering
- Related Course: Digital Signal Processing, Random Signal Theory, Image Processing (GPA: 3.2/4.5, Related Course GPA: 3.83/4.5)

PUBLICATIONS

1. **Gisu Chung**, Cheesun Won, "Filter pruning by image channel reduction in pre-trained convolutional neural networks" *Multimedia Tools and Applications (MTAP) : 1-10.* (2020) [IF 2.6]
2. **Gisu Chung**, Seungjae Park, Chul Kwon Chung, "Deep learning based model for detecting sewer pipe defects", *KSCE* (2020) - oral
3. Jongyoung Kim, **Gisu Chung**, Cheesun Won, "SIFT-NonSIFT Classification of Image Patches using CNN", *KIBME* (2018) - poster

PATENTS

1. Cheesun Won, **Gisu Chung**, "Apparatus and method for reducing number of channels in input images to compress deep neural networks" (Korea – Registration No. 10-2120681)
2. **Gisu Chung**, Euichul Shin, Yangseob Kim, "Apparatus and method for detection defect of sewer pipe based on deep learning" (Korea – Registraion No. 10-2008973)

WORK EXPERIENCES

Feb. 2021~ May. 2021 — **Hyperconnect Co., Ltd.** — **Seoul, Korea**
Machine Learning Engineer Intern
- Led in a research project that protects real-time inference network embedded in a real-time video chat platform ("Azar") from several model hacking scenarios such as data-free knowledge distillation attack and gradient stealing (PyTorch)
- Developed large-scale classification model by training 400m+ image data to enhance AI user community monitoring system ("Azar Community Health Care"); c.$76k annual monitoring cost saved (TensorFlow)
- Built ML pipeline for automatic online-learning model by using Kubeflow to improve the performance of Azar Community Health Care system

Jan. 2020~ Feb. 2020 — **Haemoon Development Co., Ltd.** — **Seoul, Korea**
Machine Learning Research Intern
- Introduced deep learning technology for detection of defects in sewer pipe and developed a CNN with 93.4% accuracy by using cutout augmentation and pyramidal-architecture (PyTorch)
- Granted a patent for the method from KIPO, published a paper on KSCE

RESEARCH PROJECTS

Apr. 2019~ Sep. 2020 — **Optimal Video Restructuring and its applications to Neural Networks and Cloudlets**
National Research Fundamental Scientific Research Program (NRF)
- Studied and tested the effect of gray images on the CNN recognition performance, identified that certain domain-specific problems including FER and OCR are relatively insensitive to the color components
- Improved CNN compression efficiency by reducing the channel of input images and pruning (PyTorch); parameter reduced by 50% while degradation of performance is less than 1%
- Granted a patent for the method from KIPO, published a paper on MTAP

Mar. 2019~ Apr. 2019 — **Preprocessing for feature preserving image compressions**
National Research Fundamental Scientific Research Program (NRF)
- Improved FER system accuracy 2.1% higher by adopting the auto-augmentation through attention mask that memorizing facial action units (PyTorch); trained lightweight SIFT classification model (MATLAB)

Mar. 2018~ Jun. 2018 — **Signal Reception Using Drone**
Enterprise and society tailored capstone design project with LIG Nex1 Co., Ltd
- Designed a software program that inverts the azimuth angle from the phase difference to detect RF signals radiated in the space (C++); won the award of excellence

SKILLS AND OTHER INFORMATION

Languages — Native in Korean, Advanced in English (TOIEC SPEAKING: Level 6)
Computer skills — Proficient in Python, TensorFlow, C++, MATLAB, and Expert in PyTorch
Military Service — Republic of Korea Army, 9th infantry division headquarter, education-training department
